

AGENTIC CMMS

Building the most cost-efficient AI agent for CMMSs

PRESENTED BY
TEAM LEAPERS

THE PROBLEM

One coordinator. 1,700 workers. 24/7 machines.

- RT Knits runs 24/7 with 82+ technicians
- Every maintenance request goes through one coordinator
- Workers walk to a computer, fill a form, and wait - while machines stay broken
- Planning, prioritization, diagnosing and dispatching all live in one person's head.

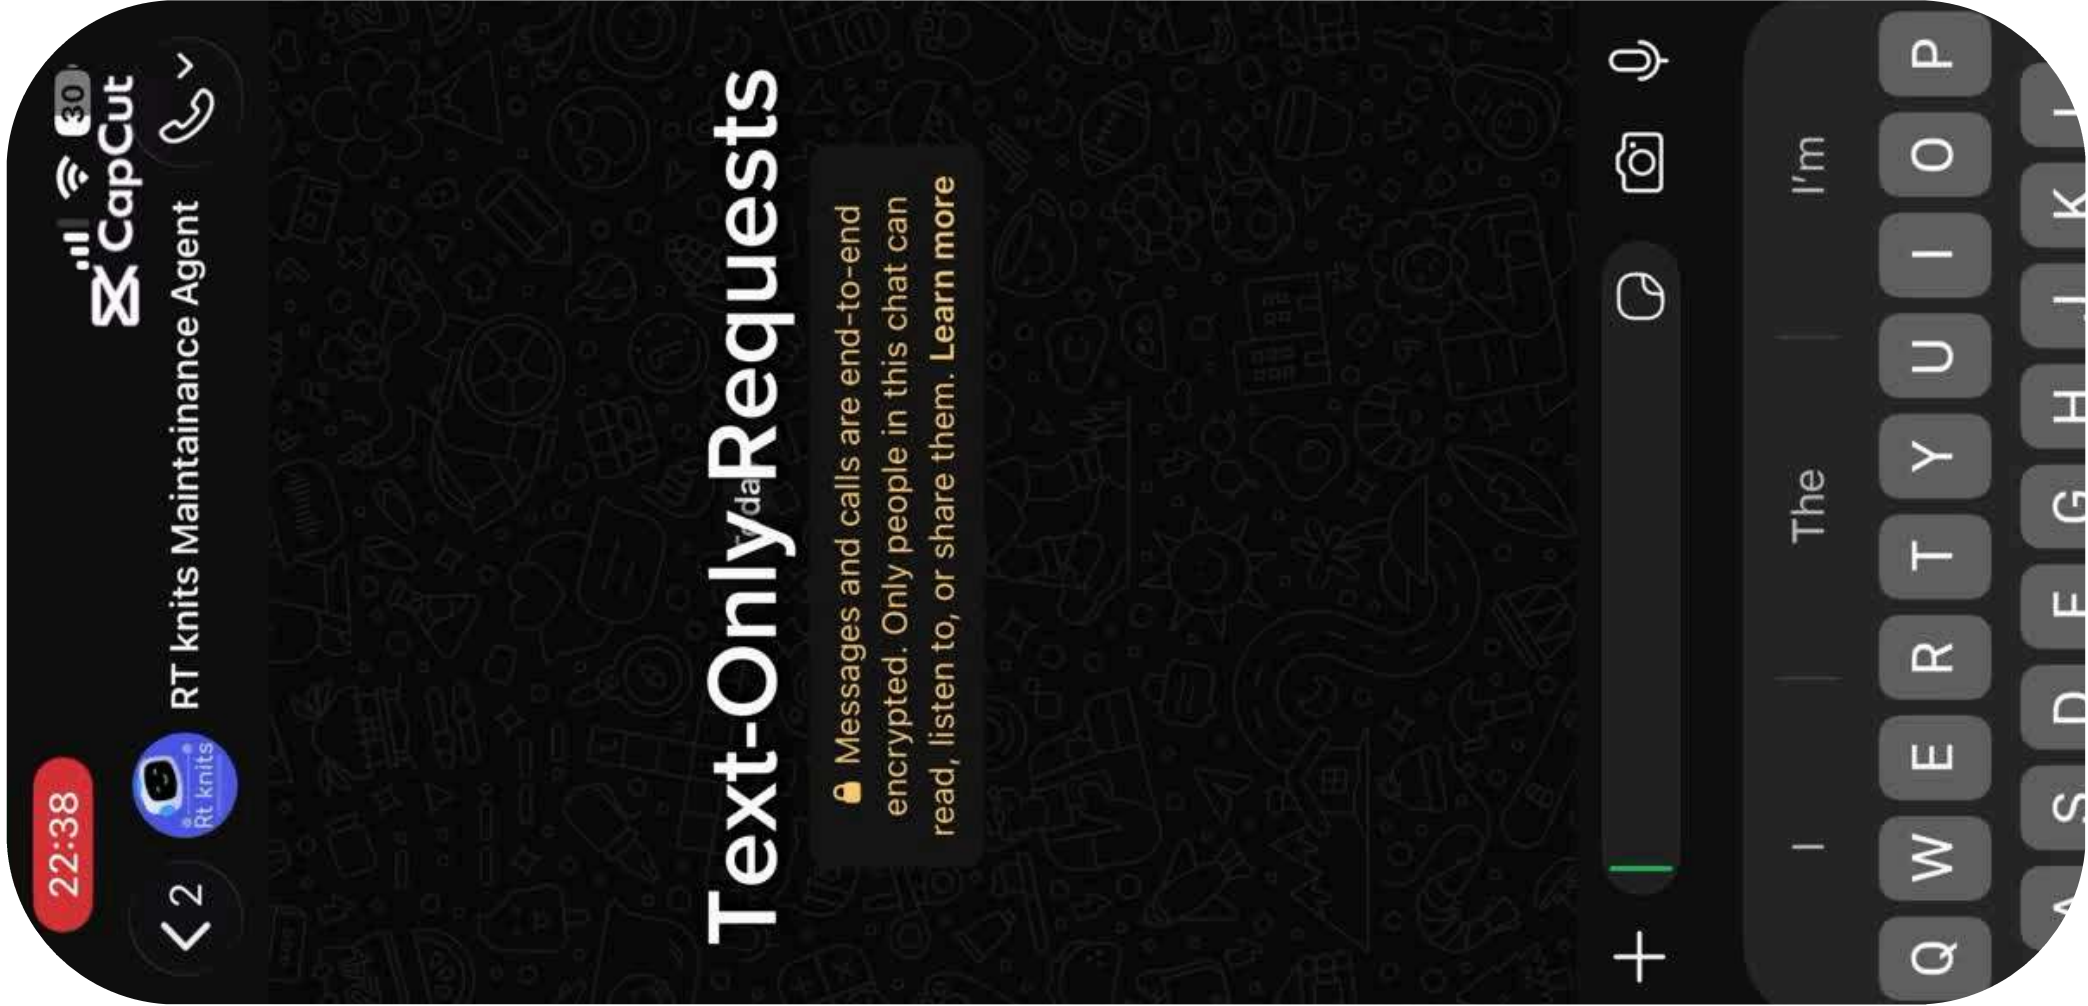

THE COORDINATION GAP, TODAY

What We Built

VIDEO DEMO

01	WHATSAPP Text / Voice / Image request
02	AGENT'S AI CORE REASONING Matches fault , prioritization → Calls the right tool → nearest technician
03	API CONNECTORS Built in tools are called depending on the task
04	DATABASE data is writen/read
05	INSTANT TECHNICIAN DISPATCH via WhatsApp - trade + ETA auto-attached

Feedback System

$$R_{\text{final}} = P_{\text{base}} \times M(r, \Delta t)$$

Prioritization

Claude parses natural language, voice notes and images to dynamically assign severity based on operational impact.

The 3-Tier Matrix:

- P0 (Critical): Production stopped or safety hazard.
- P1 (High): Employee wellbeing
- P2 (Routine): Cosmetic or non-urgent improvements

The API Layer

default	<
POST	/webhook/api/chat Chat Endpoint
GET	/api/workorders List Work Orders
GET	/api/technicians List Technicians
POST	/api/technicians Add Technician
GET	/api/assets List Assets
GET	/api/stats Get Stats
DELETE	/api/workorders/{wo_id} Delete Work Order Api
POST	/api/chat Chat Bridge
GET	/health Health
System Tests	<
POST	/api/trigger-planning Trigger Planning
POST	/test/1-generate-pms Test Pm Generation
POST	/test/3-p0-interrupt Test P0 Interrupt
POST	/test/4-feedback-gate Test Feedback Gating
Schemas	<
ChatRequest	> Expand all object
HTTPValidationError	> Expand all object
ValidationError	> Expand all object

Frictionless

Native multi-lingual WhatsApp support (English, French, Hindi) with built-in voice, image, and translation capabilities, requiring zero worker training.

True Automation

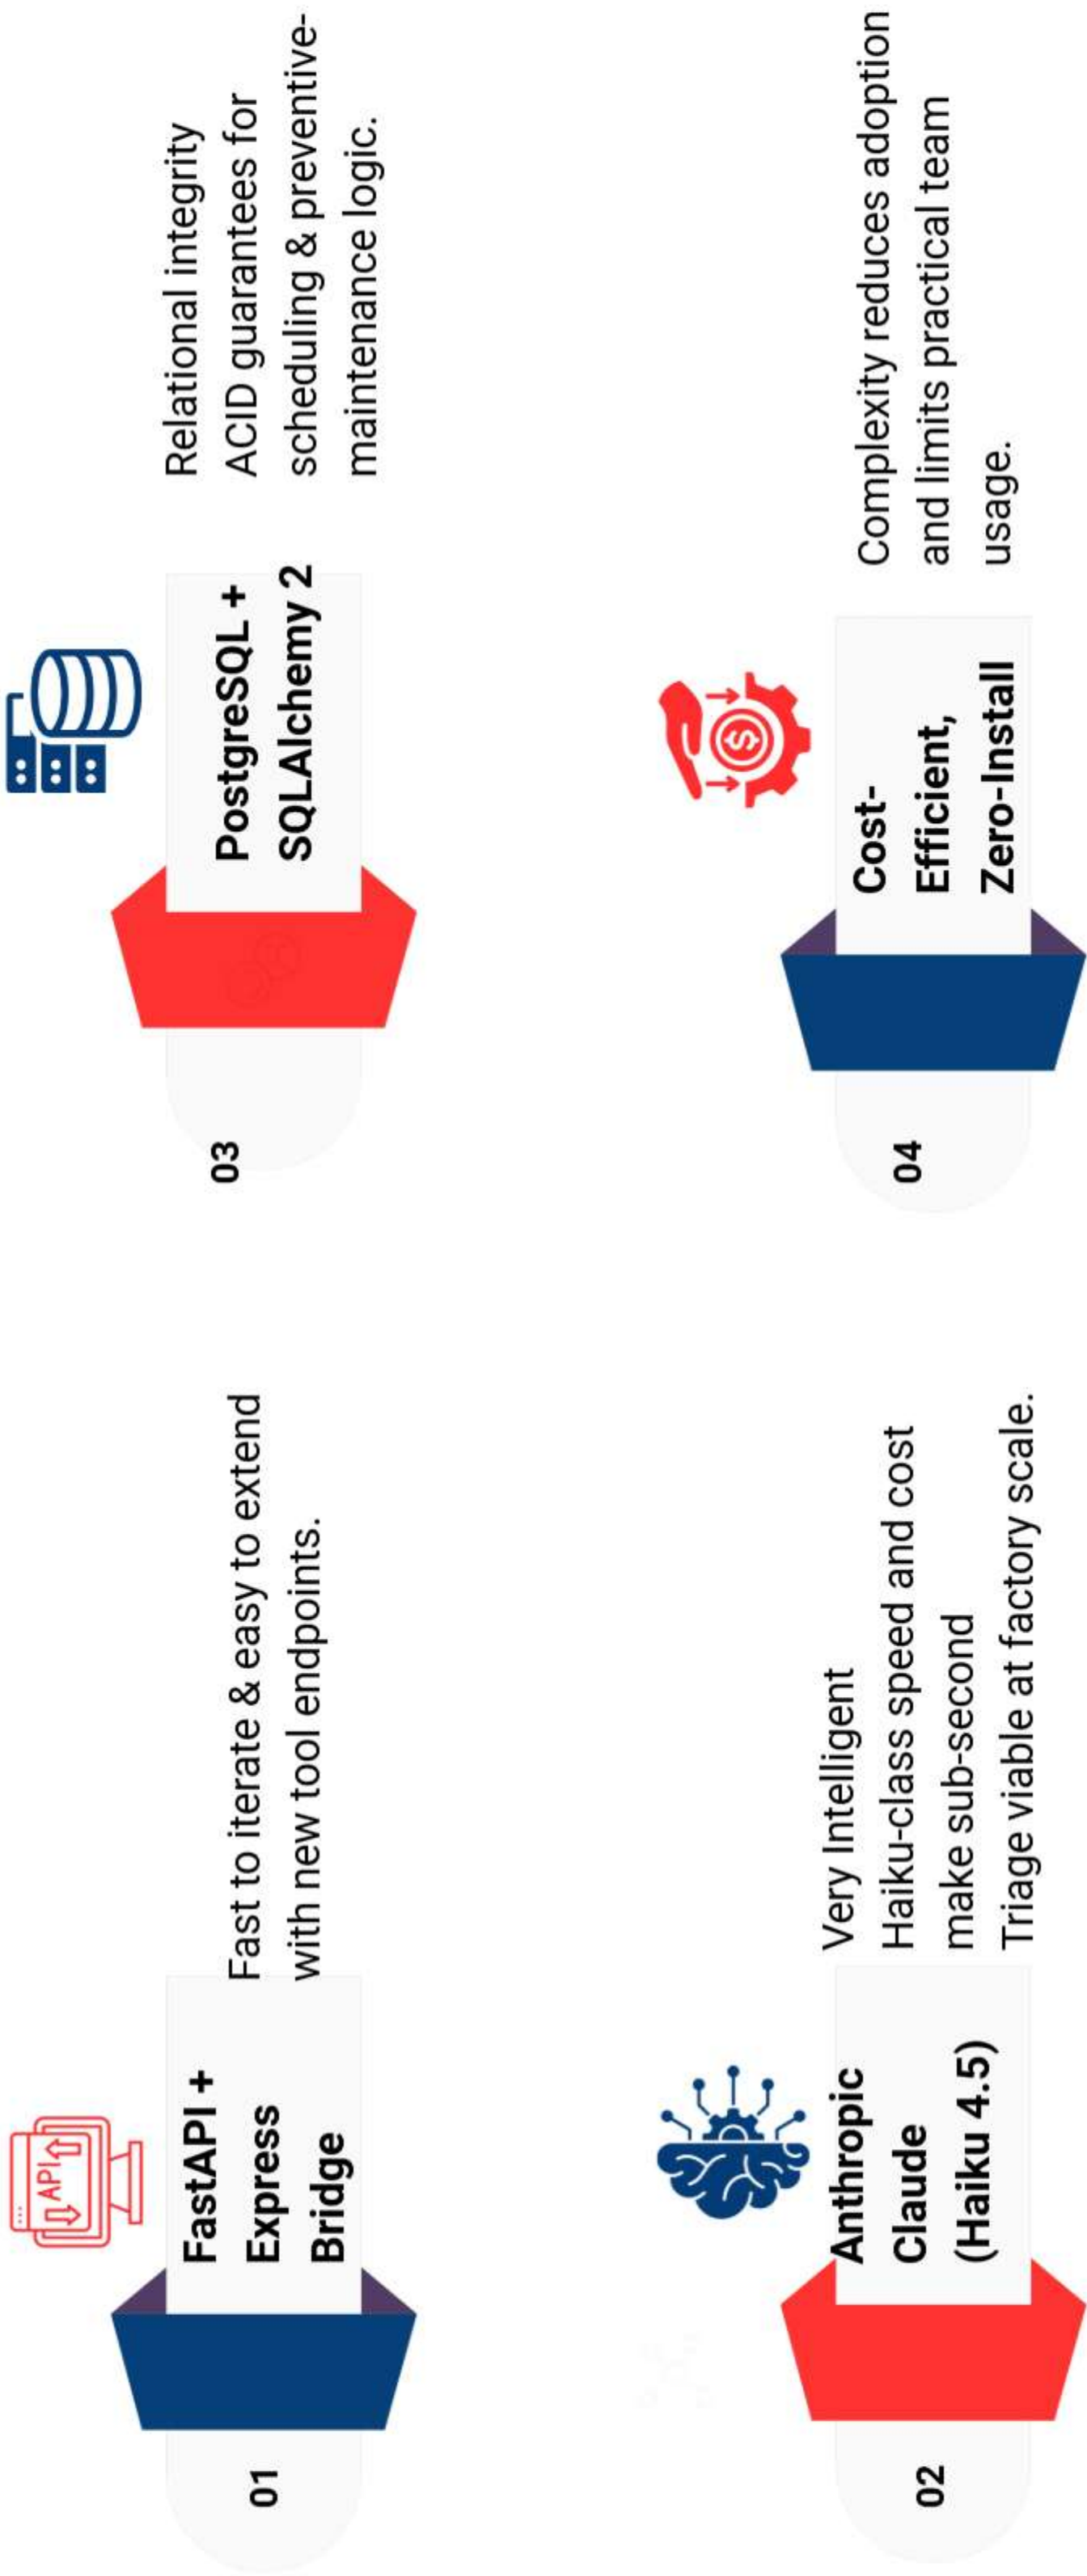

Multiple Agent handles the heavy lifting of operational routing, allowing the coordinator to maintain strategic oversight.

Self-Learning

Continuous feedback loops autonomously map recurring machine failures to technician performance metrics for ongoing improvement.

OUR TECH INFRASTRUCTURE

Cost Breakdown At Scale

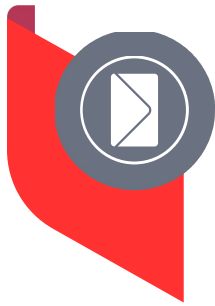

Estimated monthly cost

CATEGORY	WHAT IT COVERS	USD / MONTH	MUR / MONTH
Claude AI (Haiku 4.5)	Triage, prioritization, PM generation ~300-500 requests/mo	\$5 – \$15	Rs 235 – Rs 705
Hosting & Database	FastAPI + PostgreSQL on a small cloud VPS	\$12 – \$25	Rs 565 – Rs 1,175
WhatsApp Business Channel	BSP / Cloud API conversation fees at scale	\$10 – \$30	Rs 470 – Rs 1,410
Voice Transcription	Local Whisper model - no per-call API fee	\$0	Rs 0

Total per factory \$27 – \$70 Rs 1,270 – Rs 3,290

Based on Anthropic's published Claude Haiku 4.5 API pricing (\$1 / \$5 per million input/output tokens, Jul 2026) and typical small-VPS hosting. WhatsApp BSP fees vary by country and provider. Exchange rate used: 1 USD ≈ 47 MUR.

THANK YOU
